Code Smell Type: Abuse Object-Oriented
Classes involved: SectionPagerAdapter
Methods involved: getItem()
Description: Using a switch statement with value depending on the requirement
Solution: Using several classes instead of the switch statement. Or we can use multiple functions.

Code Smell Type: Duplicated Code
Classes involved: ContactList and ItemList
Methods involved: boolean saveContacts(Context context) , boolean saveItems(Context context)
Description: A lot of duplicating part of the methods
Solution: Create another class or function to put the code neat
